35 Trust Land Transfer (30000066)

1 The appropriation in this section is subject to the following  
2 conditions and limitations:

3 (1) The total appropriation is provided to the department solely to  
4 transfer from trust status, or enter into fifty year leases for,  
5 certain trust lands of statewide significance deemed appropriate for  
6 state park, fish and wildlife habitat, natural area preserve, natural  
7 resources conservation area, open space, housing and essential  
8 government services, or recreation purposes. The approved list of  
9 properties for lease or transfer is identified in the LEAP capital  
10 document No. 2009-2a, developed April 23, 2009.

11 (2) Property transferred under this section must be appraised and  
12 transferred at fair market value. The value of the timber transferred  
13 must be deposited by the department to the common school construction  
14 account in the same manner as timber revenues from other common school  
15 trust lands. No deduction may be made for the resource management cost  
16 account under RCW 79.64.040. The value of the land transferred must be  
17 deposited in the natural resources real property replacement account.

18 (3) Property subject to lease agreements under this section must be  
19 appraised at fair market value. Lease terms must be fifty years with  
20 options to renew for an additional fifty years. Lease payments must be  
21 lump sum payments for the entire term of the lease at the beginning of  
22 the lease. The department shall calculate such lump sum payments using  
23 professional appraisal standards. These lease payments may not exceed  
24 the fee simple purchase price based on current fair market value and  
25 must be deposited by the department to the common school construction  
26 account in the same manner as lease revenues from other common school  
27 trust lands. No deduction may be made for the resource management cost  
28 account under RCW 79.64.040.

29 (4) All reasonable costs incurred by the department to implement  
30 this section are authorized to be paid out of the appropriations.  
31 Authorized costs include the actual cost of appraisals, staff time,  
32 environmental reviews, surveys, and other similar costs and shall not  
33 exceed one and nine-tenths percent of the appropriation.

34 (5) Intergrant exchanges between common school and other trust  
35 lands of equal value may occur if the exchange is in the interest of  
36 each trust, as determined by the board of natural resources.

37 (6) Prior to or concurrent with conveyance of these properties, the  
38 department, with full cooperation of the receiving agencies, shall

1 execute and record a real property instrument that dedicates the  
2 transferred properties to the purposes identified in subsection (1) of  
3 this section. Transfer and lease agreements for properties identified  
4 in subsection (1) of this section must include terms that restrict the  
5 use of the property to the intended purpose. Transfer and lease  
6 agreements may include provisions for receiving agencies to request  
7 alternative uses of the property, provided the alternative uses are  
8 compatible with the original intended public purpose and the department  
9 and legislature approves such uses.

10 (7) The department and receiving agencies shall work in good faith  
11 to carry out the intent of this section. However, the department or  
12 receiving agencies may remove a property from the transfer list based  
13 on new, substantive information, if it is determined that transfer of  
14 the property is not in the statewide interest of either the common  
15 school trust or the receiving agency.

16 (8) The department shall execute trust land transfers that, after  
17 the deduction of reasonable costs as provided in subsection (4) of this  
18 section, eighty percent of the total value of transferred property is  
19 timber value and is deposited in the common school construction  
20 account. To achieve the eighty percent requirement, the department may  
21 choose to lease properties originally intended as transfers.

22 (9) \$4,189,000 of the amount appropriated is provided solely for  
23 fifty-year leases of development rights from timber lands at risk of  
24 conversion to non-timber land uses purchased from appropriations in the  
25 2007-2009 fiscal period.

26 (10) (~~On June 30, 2011,~~) The state treasurer shall transfer all  
27 remaining uncommitted funds from this appropriation to the common  
28 school construction account and the appropriations in this section

13 ~~(1) ((The office of financial management may authorize a transfer  
14 of appropriation authority provided for a capital project that is in  
15 excess of the amount required for the completion of such project to  
16 another capital project for which the appropriation is insufficient.  
17 No such transfer may be used to expand the capacity of any facility  
18 beyond that intended in making the appropriation. Such transfers may  
19 be effected only between capital appropriations to a specific  
20 department, commission, agency, or institution of higher education and  
21 only between capital projects that are funded from the same fund or  
22 account. No transfers may occur between projects to local government  
23 agencies except where the grants are provided within a single omnibus  
24 appropriation and where such transfers are specifically authorized by  
25 the implementing statutes that govern the grants.~~

35 project be defined as proposed to the legislature in the governor's  
36 budget document, unless it clearly appears from the legislative history

1 that the legislature intended to define the scope of a project in a  
2 different way.

3 ~~((4) Transfers of funds to an agency's infrastructure savings  
4 appropriation are subject to review and approval by the office of  
5 financial management. Expenditures from an infrastructure savings  
6 appropriation are limited to projects that have a primary purpose to

8 affect the ability to utilize the infrastructure for its current  
9 programmatic use; (b) reduce the life expectancy of the infrastructure;  
10 or (c) increase the operating costs of the infrastructure for its

31 (b) Proposed alternates submitted in bid documents if agencies  
32 cannot document a programmatic need and an operational budget savings  
33 resulting from the completion of the alternate project component that  
34 would pay for the cost of the alternate within eight years; or

35 (c) For any equipment costs or project scope beyond what was  
36 described in the budget documents submitted as part of the governor's  
37 capital budget request.

1       (3) The office of financial management shall submit a monthly  
2 report of approved allotments, subject to this section, by project.
