17 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

18 NEW SECTION. **Sec. 1.** (1) A capital budget is hereby adopted and,  
19 subject to the provisions set forth in this act, the several dollar

1 amounts hereinafter specified, or so much thereof as shall be  
2 sufficient to accomplish the purposes designated, are hereby  
3 appropriated and authorized to be incurred for capital projects during  
4 the period beginning with the effective date of this act and ending  
5 June 30, 2013, out of the several funds specified in this act.

6 (2) The definitions in this subsection apply throughout this act  
7 unless the context clearly requires otherwise.

8 (a) "Fiscal year 2012" or "FY 2012" means the period beginning July  
9 1, 2011, and ending June 30, 2012.

10 (b) "Fiscal year 2013" or "FY 2013" means the period beginning July  
11 1, 2012, and ending June 30, 2013.

12 (c) "Lapse" or "revert" means the amount shall return to an  
13 unappropriated status.

14 (d) "Provided solely" means the specified amount may be spent only  
15 for the specified purpose.

16 (3) Amounts appropriated for fiscal year 2012 may be expended from  
17 July 1, 2011, through June 30, 2013. Amounts appropriated for fiscal  
18 year 2013 may only be expended from July 1, 2012, through June 30,  
19 2013.

20 (4) Unless otherwise specifically authorized in this act, any  
21 portion of an amount provided solely for a specified purpose that is  
22 not expended subject to the specified conditions and limitations to  
23 fulfill the specified purpose shall lapse.

24 (5) The amounts shown under the headings "Prior Biennia," "Future  
25 Biennia," and "Total" in this act are for informational purposes only  
26 and do not constitute legislative approval of these amounts. "Prior  
27 biennia" typically refers to the immediate prior biennium for  
28 reappropriations, but may refer to multiple biennia in the case of  
29 specific projects. A "future biennia" amount is an estimate of what  
30 may be appropriated for the project or program in the 2011-2013  
31 biennium and the following three biennia; an amount of zero does not  
32 necessarily constitute legislative intent to not provide funding for  
33 the project or program in the future.

34 (6) "Reappropriations" in this act are appropriations and, unless  
35 the context clearly provides otherwise, are subject to the relevant  
36 conditions and limitations applicable to appropriations.  
37 Reappropriations shall be limited to the unexpended balances remaining

1 on June 30, 2011, from the 2009-2011 biennial appropriations for each  
2 project.

27 Kittitas Groundwater Study (30000029)  
 28 The reappropriation in this section is subject to the following  
 29 conditions and limitations:  
 30 (1) Funds may be provided to develop and implement water banking  
 31 and transfer methods and agreements that are fully protective of senior  
 32 water rights and that protect domestic groundwater users and improve

1 the profitability of farming operations. The legislature finds such  
2 activities to be in the public interest because they can help sustain  
3 the viability of the agricultural economy and enhance the certainty of  
4 water supplies for domestic groundwater users.

5 (2) Funds may be provided to lease or purchase water rights to  
6 create a reserve water supply for domestic groundwater users that have  
7 a groundwater right with a priority date later than May 10, 1905, as  
8 well as for all out-of-priority groundwater users. In securing water  
9 for such domestic groundwater users, strong preference shall be given  
10 to the use of water banking and transfer methods that provide  
11 alternatives to permanent purchase and dry-up of agricultural water  
12 rights in the basin, including dry-year options, water banking, long-  
13 term water supply lease agreements, long-term agricultural land  
14 fallowing agreements, and reduced consumptive use through efficiency or  
15 alternative cropping arrangements while maintaining historic return  
16 flows.

17 (3) A portion of the reappropriation may be used for administrative  
18 costs, not to exceed four percent, and other costs associated with  
19 leasing or acquiring and transferring the water rights. All costs  
20 shall be fully recovered from participating domestic water users for  
21 their prorated portion of the cost, including but not limited to the  
22 costs of securing a water right or rights for this purpose, costs  
23 associated with the development and implementation of alternative  
24 agricultural water transfer methods, associated annual operational  
25 costs, and federal water service contract costs owed to the United  
26 States bureau of reclamation. Funds recovered in this manner shall be  
27 deposited in the state and local improvement revolving fund and may be  
28 used for any purpose provided in this section.

7 transfer from trust status, or enter into fifty year leases for,  
8 certain trust lands of statewide significance deemed appropriate for  
9 state park, fish and wildlife habitat, natural area preserve, natural  
10 resources conservation area, open space, or recreation purposes. The  
11 approved list of properties for lease or transfer is identified in the  
12 LEAP capital document No. 2011-4A, developed March 22, 2011.

13 (2) Property transferred under this section must be appraised and  
14 transferred at fair market value. No later than September 30, 2011,  
15 the department must deposit in the common school construction account  
16 the portion of the appropriation in this section that represents the  
17 estimated value of the timber on the transferred properties. This  
18 transfer must be made in the same manner as timber revenues from other  
19 common school trust lands. No deduction may be made for the resource  
20 management cost account under RCW 79.64.040. The portion of the  
21 appropriation in this section that represents the value of the land  
22 transferred must be deposited in the natural resources real property  
23 replacement account.

24 (3) Property subject to lease agreements under this section must be  
25 appraised at fair market value. Lease terms must be fifty years with  
26 options to renew for an additional fifty years. Lease payments must be  
27 lump sum payments for the entire term of the lease at the beginning of  
28 the lease. The department shall calculate such lump sum payments using  
29 professional appraisal standards. These lease payments may not exceed  
30 the fee simple purchase price based on current fair market value and  
31 must be deposited by the department to the common school construction  
32 account in the same manner as lease revenues from other common school  
33 trust lands. No deduction may be made for the resource management cost  
34 account under RCW 79.64.040. No later than September 30, 2011, the  
35 department must transfer to the common school construction account the  
36 portion of the appropriation in this section that is attributable to  
37 receipts from lease payments.

1 (4) All reasonable costs incurred by the department to implement  
2 this section are authorized to be paid out of the appropriations.  
3 Authorized costs include the actual cost of appraisals, staff time,  
4 environmental reviews, surveys, and other similar costs and shall not  
5 exceed one and nine-tenths percent of the appropriation.

6 (5) Intergrant exchanges between common school and other trust  
7 lands of equal value may occur if the exchange is in the interest of  
8 each trust, as determined by the board of natural resources.

9 (6) Prior to or concurrent with conveyance of these properties, the  
10 department, with full cooperation of the receiving agencies, shall  
11 execute and record a real property instrument that dedicates the  
12 transferred properties to the purposes identified in subsection (1) of  
13 this section. Transfer and lease agreements for properties identified  
14 in subsection (1) of this section must include terms that restrict the  
15 use of the property to the intended purpose. Transfer and lease  
16 agreements may include provisions for receiving agencies to request  
17 alternative uses of the property, provided the alternative uses are  
18 compatible with the original intended public purpose and the department  
19 and legislature approves such uses.

20 (7) The department and receiving agencies shall work in good faith  
21 to carry out the intent of this section. However, the department or  
22 receiving agencies may remove a property from the transfer list based  
23 on new, substantive information, if it is determined that transfer of  
24 the property is not in the statewide interest of either the common  
25 school trust or the receiving agency.

26 (8) \$71,000,000 of the appropriation must be deposited in the  
27 common school construction account by September 30, 2011. The  
28 department shall execute trust land transfers so that after the  
29 deduction of reasonable costs as provided in subsection (4) of this  
30 section on an aggregate basis eighty percent of the total value of  
31 transferred property is timber value or lease payments and is deposited  
32 in the common school construction account. To achieve the eighty  
33 percent requirement, the department may choose to lease properties  
34 originally intended as transfers or transfer properties originally  
35 intended as leases.

36 (9) By June 30, 2013, the state treasurer shall transfer to the  
37 common school construction account any unexpended balance of the  
38 appropriation in this section.

1 (10) \$500,000 of the appropriation is provided solely for the  
2 department to process the fee transfer of properties leased to the  
3 department of fish and wildlife through the trust land transfer program  
4 during the current or previous biennium.

11 NEW SECTION. **Sec. 3179. FOR THE DEPARTMENT OF NATURAL RESOURCES**  
12 Replacing State Forest Lands with Productive Forests (91000029)

13 The appropriation in this section is subject to the following  
14 conditions and limitations:

15 (1) The total appropriation is provided solely to the department to  
16 transfer from state forest land status to natural resources  
17 conservation area status certain state forest lands in counties with a  
18 population of 25,000 or less which are subject to timber harvest  
19 deferrals greater than thirty years due to the presence of wildlife  
20 species listed as endangered or threatened under the federal endangered  
21 species act. The approved list of properties for transfer is  
22 identified in the LEAP capital document No. 2011-5A, developed March  
23 24, 2011.

24 (2) Property transferred under this section must be appraised and  
25 transferred at fair market value, without consideration of management  
26 or regulatory encumbrances associated with wildlife species listed  
27 under the federal endangered species act. The value of the timber and  
28 other valuable materials transferred must be distributed as provided in  
29 RCW 79.64.110, in the same manner as valuable material revenues from  
30 other state forest lands in the applicable counties. The value of the  
31 land transferred must be deposited in the park land trust revolving  
32 account and be solely used to buy replacement state forest land within  
33 the same county as the property transferred, consistent with RCW  
34 79.22.060.

35 (3) Prior to or concurrent with conveyance of these properties, the  
36 department shall execute and record a real property instrument that

1 dedicates the transferred properties to the purposes identified in  
2 subsection (1) of this section. Transfer agreements for properties  
3 identified in subsection (1) of this section must include terms that  
4 restrict the use of the property to the intended purpose.

5 (4) The department and applicable counties shall work in good faith  
6 to carry out the intent of this section. However, the department or  
7 applicable counties may remove a property from the transfer list based  
8 on new, substantive information, if it is determined that transfer of  
9 the property is not in the statewide interest of either the state  
10 forest trust or the natural resources conservation area program.

4 Energy Operational Savings Project Grants (30000097)

5 The appropriation in this section is subject to the following  
6 conditions and limitations:

7 (1) The appropriation is provided solely for energy operational  
8 cost savings improvements to school facilities.

9 (2) Grants shall be awarded for projects using the energy savings  
10 performance contracting method under chapter 39.35C RCW or an  
11 equivalent method of evaluating and delivering energy operational costs  
12 savings improvements. Projects that do not use energy savings  
13 performance contracting must: (a) Verify energy and operational cost  
14 savings for ten years or until the energy and operational costs savings  
15 pay for the project, whichever is shorter; (b) follow the department of  
16 general administration's energy savings performance contracting method  
17 guidelines; and (c) employ a licensed engineer for the energy audit,  
18 design, and construction. The office of the superintendent of public  
19 instruction may require third-party verification of savings if a  
20 project is not implemented by an energy savings performance contracting  
21 method as outlined in chapter 39.35C RCW. If required, third-party  
22 verification must be conducted either by an energy savings performance  
23 contractor qualified by the department of general administration, or a  
24 licensed engineer that is a certified energy manager.

25 (3) Projects must be weighted and prioritized based on the  
26 following criteria and in the following order:

27 (a) Prior grant award: Priority consideration shall be given to  
28 applicants that did not receive grant awards from appropriations  
29 provided in sections 1016 and 5007, chapter 36, Laws of 2010 1st sp.  
30 sess.;

31 (b) Leverage ratio: The higher the leverage ratio of guaranteed  
32 energy savings and utility or other incentives to state grant, the  
33 higher the project ranking;

34 (c) Energy savings: The higher the simple payback for energy  
35 savings, not to exceed the useful life of the energy conservation  
36 measure, the higher the project ranking; and

1 (d) Persistence: The more extensively a project ensures the  
2 persistence of energy operational cost savings through ongoing  
3 measurement, verification, and reporting over the life of a project,  
4 the higher the project ranking.

5 (4) In order to be eligible for energy cost savings grants under  
6 this section, school districts must complete an investment grade audit  
7 prior to application, or have completed an audit in the 2009-2011  
8 biennium.

9 (5)(a) The superintendent of public instruction must use bond  
10 proceeds to pay one-half of the preliminary audit, up to five cents per  
11 square foot, if the project does not meet the school district's  
12 predetermined cost-effectiveness criteria. Public school districts  
13 must pay the other one-half of the cost of the preliminary audit if the  
14 project does not meet their predetermined cost-effectiveness criteria.

15 (b) The energy savings performance contractor shall not charge for  
16 an investment grade audit if the project does not meet the school  
17 district's predetermined cost-effectiveness criteria. Public school  
18 districts must pay the full price of an investment grade audit if they  
19 do not proceed with a project that meets the school district's  
20 predetermined cost-effectiveness criteria.

21 (6) Applicants must submit documentation that demonstrates energy  
22 and operational cost savings resulting from the installation of the  
23 energy equipment and improvements. The energy savings analysis shall  
24 be performed by a licensed engineer, and the documentation must  
25 include, but is not limited to, the following:

- 26 (i) A description of the energy equipment and improvements; and
- 27 (ii) A description of the energy and operational cost savings.

28 (7) Each school district is limited to one grant award and no more  
29 than \$1,000,000.

30 (8) The office of the superintendent of public instruction may  
31 charge projects administrative fees.

32 (9) The superintendent of public instruction must report to the  
33 appropriate committees of the legislature and the office of financial  
34 management on the timing and use of the funds by the end of each fiscal  
35 year, until the funds are fully expended.

9       **Sec. 6018.** 2010 1st. sp.s. c 36 s 1016 (uncodified) is amended to  
10 read as follows:

11 **FOR THE DEPARTMENT OF COMMERCE**

12       Jobs Act for K-12 Public Schools and Higher Education Institutions  
13 (91000085)

14       The appropriation in this section is subject to the following  
15 conditions and limitations:

16       (1) The appropriation is provided solely for grants to public  
17 school districts and public higher education institutions for  
18 operational cost savings improvements to public school district and  
19 higher education facilities and related projects that result in energy  
20 and operational cost savings. Related projects are those projects that  
21 must be completed in order for the energy efficiency improvements to be  
22 effective. Grants may also be used for loan interest payments over the  
23 term of a loan.

24       (2) The department of commerce, in consultation with the department  
25 of general administration, the office of the superintendent of public  
26 instruction, and the Washington State University energy program shall  
27 establish a competitive process to solicit and evaluate applications  
28 from public school districts and public higher education institutions.  
29 Final grant awards shall be determined by the department of commerce.

30       (3) The definitions in this section apply throughout this section.

31       (a) "Cost-effectiveness" means that the present value to public  
32 school districts and public higher education institutions of the energy  
33 reasonably expected to be saved or produced by a facility, activity,  
34 measure, or piece of equipment over its useful life, including any  
35 compensation received from a utility or the Bonneville power

1 administration, is greater than the net present value of the costs of  
2 implementing, maintaining, and operating such facility, activity,  
3 measure, or piece of equipment over its useful life, when discounted at  
4 the cost of public borrowing.

5 (b) "Energy equipment" means energy management systems and any  
6 equipment, materials, or supplies that are expected, upon installation,  
7 to reduce the energy use or energy cost of an existing building or  
8 facility, and the services associated with the equipment, materials, or  
9 supplies, including but not limited to design, engineering, financing,  
10 installation, project management, guarantees, operations, and  
11 maintenance. Reduction in energy use or energy cost may also include  
12 reductions in the use or cost of water, wastewater, or solid waste.

13 (c) "Energy cost savings" means savings realized in expenses for  
14 energy use and expenses associated with water, wastewater, or solid  
15 waste systems.

16 (d) "Energy savings performance contracting" means the process  
17 authorized by chapter 39.35C RCW by which a company contracts with a  
18 public agency to conduct energy audits and guarantee energy savings  
19 from energy efficiency.

20 (e) "Operational cost savings" means savings realized from parts,  
21 service fees, capital renewal costs, and other measurable annual  
22 expenses to maintain and repair systems. This definition does not mean  
23 labor savings related to existing facility staff.

24 (f) "Public facilities" means buildings, building components, and  
25 major equipment or systems owned by public school districts and public  
26 higher education institutions.

27 (g) "Innovative measures" means advanced or emerging technologies,  
28 systems or approaches that may not yet be in common practice but  
29 improve energy efficiency, accelerate deployment, or reduce energy  
30 usage, and become widely commercially available in the future if proven  
31 successful in demonstration programs without compromising the  
32 guaranteed performance or measurable energy and operational cost  
33 savings anticipated. Examples of innovative measures include, but are  
34 not limited to, advanced energy and systems operations monitoring,  
35 diagnostics and controls systems for buildings; novel heating, cooling,  
36 ventilation and water heating systems; advanced windows and insulation  
37 technologies, highly efficient lighting technologies, designs, and

1 controls; and integration of renewable energy sources into buildings,  
2 and energy savings verification technologies and solutions.

3 (4) Grants must be awarded in competitive rounds, based on demand  
4 and capacity, with at least five percent of each grant round awarded to  
5 small public school districts with fewer than 1,000 full-time  
6 equivalent students, based on demand and capacity.

7 (5) Within each competitive round, projects must be weighted and  
8 prioritized based on the following criteria and in the following order:

9 (a) Leverage ratio: In each round, the higher the leverage ratio  
10 of nonstate funding sources to state jobs act grant, the higher the  
11 project ranking.

12 (b) Energy savings: In each round, the higher the energy savings,  
13 the higher the project ranking. Applicants must submit documentation  
14 that demonstrates energy and operational cost savings resulting from  
15 the installation of the energy equipment and improvements. The energy  
16 savings analysis shall be performed by a licensed engineer, and the  
17 documentation must include but is not limited to the following:

18 (i) A description of the energy equipment and improvements;

19 (ii) A description of the energy and operational cost savings; and

20 (iii) A description of the extent to which the project employs  
21 collaborative and innovative measures and encourages demonstration of  
22 new and emerging technologies with high energy-savings or energy cost-  
23 reductions.

24 (c) Expediency of expenditure: Project readiness to spend funds  
25 must be prioritized so that the legislative intent to expend funds  
26 quickly is met.

27 (6) Projects that do not use energy savings performance contracting  
28 must: (a) Verify energy and operational cost savings for ten years or  
29 until the energy and operational costs savings pay for the project,  
30 whichever is shorter; (b) follow the department of general  
31 administration's energy savings performance contracting project  
32 guidelines; and (c) employ a licensed engineer for the energy audit and  
33 construction. The department of commerce may require third-party  
34 verification of savings if a project is not implemented by an energy  
35 savings performance contractor selected by the department of general  
36 administration through the request of qualifications process. Third-  
37 party verification must be conducted either by an energy savings  
38 performance contractor selected by the department of general

1 administration through a request for qualifications, a licensed  
2 engineer that is a certified energy manager, a project resource  
3 conservation manager, or educational service district resource  
4 conservation manager.

5 (7) To intensify competition, the department of commerce may only  
6 award funds to the top eighty-five percent of projects applying in a  
7 round until the department of commerce determines a final round is  
8 appropriate. Projects that do not receive a grant award in one round  
9 may reapply in subsequent rounds.

10 (8) To match federal grants and programs that require state  
11 matching funds and produce significantly higher efficiencies in  
12 operations and utilities, the level of innovation criteria may be  
13 increased for the purposes of weighted scoring to capture those federal  
14 dollars for selected projects that require a higher level of innovation  
15 and regional collaboration.

16 (9) Grant amounts awarded to each project must allow for the  
17 maximum number of projects funded with the greatest energy and cost  
18 benefit.

19 (10)(a) The department of commerce must use bond proceeds to pay  
20 one-half of the preliminary audit, up to five cents per square foot, if  
21 the project does not meet the school district's and higher education  
22 institution's predetermined cost-effectiveness criteria. Public school  
23 districts and public higher education institutions must pay the other  
24 one-half of the cost of the preliminary audit if the project does not  
25 meet their predetermined cost-effectiveness criteria.

26 (b) The energy savings performance contractor shall not charge for  
27 an investment grade audit if the project does not meet the school  
28 district's and higher education institution's predetermined cost-  
29 effectiveness criteria. Public school districts and public higher  
30 education institutions must pay the full price of an investment grade  
31 audit if they do not proceed with a project that meets the school  
32 district's and higher education institution's predetermined cost-  
33 effectiveness criteria.

34 (11) The department of commerce may charge projects administrative  
35 fees and may pay the department of general administration, the  
36 Washington State University energy program, and the office of the  
37 superintendent of public instruction administration fees in an amount  
38 determined through a memorandum of understanding.

1 (12) The department of commerce and the department of general  
2 administration must submit a joint report to the appropriate committees  
3 of the legislature and the office of financial management on the timing  
4 and use of the grant funds, program administrative function, compliance  
5 with apprenticeship utilization requirements in RCW 39.04.320,  
6 compliance with prevailing wage requirements, and administration fees  
7 by the end of each fiscal year, until the funds are fully expended and  
8 all savings verification requirements are fulfilled.

1 **PART 7**

2 **MISCELLANEOUS PROVISIONS**

3 NEW SECTION. **Sec. 7001.** (1) Allotments for appropriations in this  
4 act shall be provided in accordance with the capital project review  
5 requirements adopted by the office of financial management and in  
6 compliance with RCW 43.88.110. Projects that will be employing  
7 alternative public works construction procedures under chapter 39.10  
8 RCW are subject to the allotment procedures defined in this section and  
9 RCW 43.88.110.

10 (2) Each project is defined as proposed in the legislative budget  
11 notes or in the governor's budget document.

12 NEW SECTION. **Sec. 7002.** To ensure that major construction  
13 projects are carried out in accordance with legislative and executive  
14 intent, appropriations in this act in excess of \$5,000,000 shall not be  
15 expended or encumbered until the office of financial management has  
16 reviewed and approved the agency's predesign. The predesign document  
17 shall include but not be limited to program, site, and cost analysis in  
18 accordance with the predesign manual adopted by the office of financial  
19 management. To improve monitoring of major construction projects,  
20 progress reports shall be submitted by the agency administering the  
21 project to the office of financial management and to the fiscal  
22 committees of the house of representatives and senate. Reports will be  
23 submitted on July 1st and December 31st each year in a format to be  
24 developed by the office of financial management.

25 NEW SECTION. **Sec. 7003.** (1) To ensure minor works appropriations  
26 are carried out in accordance with legislative intent, funds  
27 appropriated in this act shall not be allotted until project lists are  
28 on file at the office of financial management, the house of  
29 representatives capital budget committee, and the senate ways and means  
30 committee. All projects must meet the criteria included in subsection  
31 (2)(a) of this section. Revisions to the lists must be filed with the  
32 office of financial management, the house of representatives capital  
33 budget committee, and the senate ways and means committee and include

1 an explanation of variances from the prior lists before funds may be  
2 expended on the revisions.

3 (2)(a) Minor works projects are single line appropriations that  
4 include multiple projects of a similar nature and that are valued  
5 between \$25,000 and \$1,000,000 each, with the exception of higher  
6 education minor works projects that may be valued up to \$2,000,000.  
7 These projects can generally be completed within two years of the  
8 appropriation with the funding provided. Agencies are prohibited from  
9 including projects on their minor works lists that are a phase of a  
10 larger project, and that if combined over a continuous period of time,  
11 would exceed \$1,000,000, or \$2,000,000 for higher education minor works  
12 projects. Improvements for accessibility in compliance with the  
13 Americans with disabilities act may be included in any of the above  
14 minor works categories.

15 (b) Minor works appropriations shall not be used for, among other  
16 things: Studies, except for technical or engineering reviews or  
17 designs that lead directly to and support a project on the same minor  
18 works list; planning; design outside the scope of work on a minor works  
19 list; moveable, temporary, and traditionally funded operating equipment  
20 not in compliance with the equipment criteria established by the office  
21 of financial management; software not dedicated to control of a  
22 specialized system; moving expenses; land or facility acquisition; or  
23 to supplement funding for projects with funding shortfalls unless  
24 expressly authorized elsewhere in this act. The office of financial  
25 management may make an exception to the limitations described in this  
26 subsection (2)(b) for exigent circumstances after notifying the  
27 legislative fiscal committees and waiting ten days for comments by the  
28 legislature regarding the proposed exception.

29 (c) Minor works preservation projects may include program  
30 improvements of no more than twenty-five percent of the individual  
31 minor works preservation project cost.

32 (3) It is generally not the intent of the legislature to make  
33 future appropriations for capital expenditures or for maintenance and  
34 operating expenses for an acquisition project or a significant  
35 expansion project that is initiated through the minor works process and  
36 therefore does not receive a policy and fiscal analysis by the  
37 legislature. Minor works projects are intended to be one-time  
38 expenditures that do not require future state resources to complete.

1        NEW SECTION.    **Sec. 7004.**    (1) The office of financial management  
2 may authorize a transfer of appropriation authority provided for a  
3 capital project that is in excess of the amount required for the  
4 completion of such project to another capital project for which the  
5 appropriation is insufficient. No such transfer may be used to expand  
6 the capacity of any facility beyond that intended in making the  
7 appropriation. Such transfers may be effected only between capital  
8 appropriations to a specific department, commission, agency, or  
9 institution of higher education and only between capital projects that  
10 are funded from the same fund or account. No transfers may occur  
11 between projects to local government agencies except where the grants  
12 are provided within a single omnibus appropriation and where such  
13 transfers are specifically authorized by the implementing statutes that  
14 govern the grants.

15        (2) The office of financial management may find that an amount is  
16 in excess of the amount required for the completion of a project only  
17 if: (a) The project as defined in the notes to the budget document is  
18 substantially complete and there are funds remaining; or (b) bids have  
19 been let on a project and it appears to a substantial certainty that  
20 the project as defined in the notes to the budget document can be  
21 completed within the biennium for less than the amount appropriated in  
22 this act.

23        (3) For the purposes of this section, the intent is that each  
24 project be defined as proposed to the legislature in the governor's  
25 budget document, unless it clearly appears from the legislative history  
26 that the legislature intended to define the scope of a project in a  
27 different way.

28        (4) The office of financial management shall report any transfer  
29 effected under this section to the house of representatives capital  
30 budget committee, the senate ways and means committee, and the  
31 legislative evaluation and accountability program committee, at least  
32 thirty days before the date the transfer is effected. The office of  
33 financial management shall report all emergency or smaller transfers  
34 within thirty days from the date of transfer. The governor's capital  
35 budget request following any transfer shall reflect that transfer in  
36 the affected agency.

1       **Sec. 7005.** RCW 39.35B.050 and 2007 c 506 s 3 are each amended to  
2 read as follows:

3       The office of financial management shall:

4       (1) Design and implement a cost-effective life-cycle cost model by  
5 October 1, 2008, based on the work completed by the joint legislative  
6 audit and review committee in January 2007 and in consultation with  
7 legislative fiscal committees;

8       (2) Deploy the life-cycle cost model for use by state agencies once  
9 completed and tested;

10       (3) Update the life-cycle cost model periodically in consultation  
11 with legislative fiscal committees;

12       (4) Establish clear policies, standards, and procedures regarding  
13 the use of life-cycle cost analysis by state agencies including:

14       (a) When state agencies must use the life-cycle cost analysis,  
15 including the types of proposed capital projects and leased facilities  
16 to which it must be applied;

17       (b) Procedures state agencies must use to document the results of  
18 required life-cycle cost analyses;

19       (c) Standards regarding the discount rate and other key model  
20 assumptions; (~~and~~)

21       (d) A process to document and justify any deviation from the  
22 standard assumptions;

23       (e) Establish a requirement that agencies conduct the analysis  
24 comparing a thirty-year and fifty-year building life when using the  
25 life-cycle cost model; and

26       (f) Establish a requirement that agencies include renovation,  
27 system replacement, and remodel costs in maintenance costs for use in  
28 the life-cycle cost model.

29       NEW SECTION. **Sec. 7006.** (1) It is expected that projects be ready  
30 to proceed in a timely manner depending on the type or phase of the  
31 project or program that is the subject of the appropriation in this  
32 act. Except for major projects that customarily may take more than two  
33 biennia to complete from predesign to the end of construction, or large  
34 infrastructure grant or loan programs supporting projects that often  
35 take more than two biennia to complete, the legislature generally does  
36 not intend to reappropriate funds more than once, particularly for  
37 smaller grant programs, local/community projects, and minor works.

1 (2) Agencies shall expedite the expenditure of reappropriations and  
2 appropriations in this act in order to: (a) Rehabilitate  
3 infrastructure resources; (b) accelerate environmental rehabilitation  
4 and restoration projects for the improvement of the state's natural  
5 environment; (c) reduce additional costs associated with acquisition  
6 and construction inflationary pressures; and (d) provide additional  
7 employment opportunities associated with capital expenditures.

8 (3) To the extent feasible, agencies are directed to accelerate  
9 expenditure rates at their current level of permanent employees and  
10 shall use contracted design and construction services wherever  
11 necessary to meet the goals of this section.

12 NEW SECTION. **Sec. 7007.** State agencies, including institutions of  
13 higher education, shall allot and report full-time equivalent staff for  
14 capital projects in a manner comparable to staff reporting for  
15 operating expenditures.

16 NEW SECTION. **Sec. 7008.** The department of general administration  
17 shall not charge the facility depreciation component of lease charges  
18 for nonprofit tenants in the building adjoining Capitol Way and 11th  
19 avenue during the 2011-2013 biennium.

20 NEW SECTION. **Sec. 7009.** It is the intent of the legislature to  
21 meet the narrow banding requirements set forth by the federal  
22 communication commission. The department of general administration and  
23 the Washington state patrol must report the results of the  
24 preengineering study with cost estimates and schedule requirements as  
25 required in section 106, chapter ..., Laws of 2011 (PSHB 1175), to the  
26 house of representatives capital budget committee and the senate ways  
27 and means committee by December 31, 2011, for possible inclusion in the  
28 2012 supplemental capital budget.

29 NEW SECTION. **Sec. 7010.** Executive Order No. 05-05, archaeological  
30 and cultural resources, was issued effective November 10, 2005.  
31 Agencies and higher education institutions shall comply with the  
32 requirements set forth in this executive order.

1        NEW SECTION.    **Sec. 7011.**    The capital projects advisory review  
2 board and the department of general administration, in consultation  
3 with the office of superintendent of public instruction, shall develop  
4 a performance-based school construction pilot program.    The pilot  
5 program must consist of a minimum of two new K-12 school construction  
6 projects and two K-12 modernization projects, for consideration under  
7 the school construction assistance grant program.    Performance-based  
8 contracting as allowed in chapter 39.35A RCW shall be the means of  
9 project delivery for all applicable systems or structural improvements.  
10 The program shall at a minimum include the following:    (1) Guidelines  
11 for developing a prequalified list of energy services contractors  
12 eligible for selection to lead or participate on a team to design and  
13 construct a new building, or renovate a building; (2) a process for  
14 evaluating the projects submitted by school districts to determine if  
15 they are candidates for the pilot; (3) a model contract that requires  
16 a guarantee of system performance by way of ongoing monitoring and  
17 verification of energy measures to be used in the building; and (4) any  
18 rule making or oversight that the department of general administration  
19 considers necessary for the success of the pilot program.    The pilot  
20 program recommendations shall be delivered to the house capital budget  
21 committee and the senate ways and means committee by January 1, 2012.

22        NEW SECTION.    **Sec. 7012.    ACQUISITION OF PROPERTIES AND FACILITIES**  
23 **THROUGH FINANCIAL CONTRACTS**

24        The following agencies may enter into financial contracts, paid  
25 from any funds of an agency, appropriated or nonappropriated, for the  
26 purposes indicated and in not more than the principal amounts
