FOR THE STATE BOARD OF EDUCATION

Public school building construction: 1989 (90-2-001)

The appropriation in this section is subject to the following conditions and limitations:

(1) A maximum of \$1,050,000 may be spent for state administration of school construction funding.

(2) \$66,136,000 is provided solely for modernization projects previously approved by the state board of education. An additional \$26,892,000 is provided solely for modernization projects if at least \$40,000,000 is appropriated for school construction by the legislature by June 30, 1990, over and above the amounts appropriated for school construction in this act.

(3) The appropriation in this section includes proceeds of the issuance of bonds authorized for deposit in the common school construction fund by chapter 3, Laws of 1987 1st ex. sess., and ten million dollars in additional state bonds authorized by chapter 14, Laws of 1989 1st ex. sess. (~~Of the proceeds of bonds authorized by chapter 14, Laws of 1989 1st ex. sess., \$8,000,000, or as much thereof as may be necessary, shall be compensation to the common school construction fund for the sale of timber from common school trust lands sold to the parks and recreation commission pursuant to RCW~~

~~43.51.270, and authorized for sale by the legislature prior to January 1, 1989.)~~)

(4) The state board shall review current rules and administrative procedures, and shall amend or revise these rules and procedures to address the following concerns:

(a) The discrepancy between the forecasted enrollments used for determining state funding for school construction, and the state-wide growth trends predicted by the office of financial management;

(b) The infrequency of cooperative use of surplus space available in neighboring districts;

(c) The creation of new construction needs by school districts by selling or demolishing schools, or by redesignating grade space or administrative use of school buildings;

(d) The incentive to condemn useable schools to secure state funding, rather than awaiting uncertain support for modernization;

(e) Greater needs for replacement of decaying schools caused by deferral of modernization, at a higher long-term cost to the state and local districts;

(f) The potential of district boundary changes for the purpose of achieving more efficient use of facilities; and

(g) The potential of the state to recover its share of the value of sold school buildings that were built with state matching moneys.

Prior to September 15, 1989, the state board of education shall report to the capital facilities and financing committee of the house of representatives and the ways and means committee of the senate on the actions taken or rules adopted by the board to address these concerns.

(5) \$11,748,000 is provided solely for vocational-technical institute projects previously approved by the state board of education if at least
